

Public Bike Pump

This heavy duty bike pump is a modern piece of street furniture that can be installed in any public area to provide cyclists with a convenient facility to pump deflated tyres on the move.

The pump features a robust stainless steel handle as well as an armoured air hose designed to withstand constant public use.

This product is ideal for installing within bike parks or along cycle routes. They be incorporated neatly into a row of bollards or used as a stand-alone pump in high profile city centre locations. It is a great accompaniment to our Public Bike Repair Stand.
