

## MEISER STEPBLOC D

# MEISER STEPBLOC D

## PRODUCT INFORMATION

Don't slip up on health and safety. German precision and quality, Meiser Stepbloc D offers superior anti-slip and stability with medium height serrations on a densely punched surface. Stepbloc D's excellent grip and self-draining properties make this product the ideal choice for industrial and agricultural use.

Stepbloc D is available in various materials, widths and lengths. Ask one of our sales people about the many options. Special sizes or materials on request.

Type	Material mm	Mesh LxWxH	Standard Dimensions LxWxH	Wt. Per item	AS Class
Stepbloc D 240	2.0mm MSHDG 4	3x12x10mm	3000x240x40mm	16.8kg	R13/R12
Stepbloc D 300	2.0mm MSHDG 4	3x12x10mm	3000x300x40mm	18.1kg	R13/R12

### Load Tables

Plank Width	Plank Height	Material mm	Max. Inner Span in mm	Max. Point Load in Transverse Direction in KN
240mm	40mm	2.0mm	860	7.75
300mm	40mm	2.0mm	1050	5.34

The specified spans apply for maximum deflection of 4mm.

Areas safe for walking (2 kN point load on an area 200x200mm and 5 kN/M<sup>2</sup> uniformly distributed payload).

The specified values relate to standard plank dimensions. Static values for differing plank dimensions can be provided on request.
